

We are engineering consultants & project managers that specialize in delivering sustainable energy solutions that are guaranteed to improve our client's bottom line.

Established in 2010, Grey Green is based in Cape Town and operates throughout Southern Africa. Our team of energy experts comprises mechanical, electrical, chemical, civil & computer engineers. Grey Green is also an Eskom accredited Energy Services Company (ESCO).

Our reason for existing is to harness our skills & experience to develop projects with strong value propositions for our clients that utilize sustainable energy- energy that is accessible, cleaner & more efficient- in order to conserve our natural resources and preserve the environment while promoting socio-economic development.
